Is My Dog Sick?

Do I need to take him to the Vet?

You need to call us to make an appointment for your dog if...

- It has started vomiting
- It has diarrhea
- It is drinking excessively and/or urinating excessively
- It's attitude/behavior has dramatically changed
- It has been coughing or sneezing
- It has no appetite
- It has started to urinate or defecate in the house

Your dog needs to be seen immediately if...

- It has ingested a foreign object, toxin, or a human medication like Tylenol.
- It has suffered head, abdomen, chest or any type of trauma
- It is not responsive to you.
- It has a distended abdomen and is trying to vomit (especially in large breed dogs!)
- It is straining to urinate and not producing any urine
- It is having seizures
